PERSONAL PROFILE

Former outdoor industry professional that enjoyed using technology to make his job easier. My journey started out with programming Excel sheets to automate tasks, and has led me to building and deploying full stack applications from front to back.

SKILL SET

Proficient

- JavaScript
- HTML/CSS
- ReactJS
- NodeJS

Knowledgeable

- Git
- PostgreSQL
- Express
- Webpack

Familiar

- MongoDB
- TypeScript
- Jasmine

PROJECTS

Scribe | [Heroku](#) + [GitHub](#)

Transcribes recorded Zoom meetings.

- Built on MongoDB, Express, React, Node stack, and secured with Oath 2.
- Utilizes Google Cloud Platform to store and transcribe audio.

Surf Shop | [Heroku](#) + [GitHub](#)

eCommerce app for selling surf boards and stand up paddle boards.

- Built authentication with bcrypt and JWTs, including support for users to sign up and shop, support for guests to shop, and features for administrators to lock and edit user accounts
- Completed in 10 business days with a team of 3 developers. Specific role was to design implement authentication and build out the front end with ReactJS and Material UI.

Productivity Tracker | [Heroku](#) + [GitHub](#)

Users can sign up and keep track of activities, classifying them either as productive or unproductive, then a score is calculated to summarize the day.

- Developed with React, Express, Node, and PostgreSQL.

EXPERIENCE

FINANCIAL ASSISTANT

Learning Systems Institute | January 2015 - May 2018

- Utilized advanced Excel features to create sheets that automated budget reconciliation. Still in use today, these sheets save about ten hours of work per week
- Created framework in SCRATCH for future published lesson plans to be utilized across the state of Florida in science and geography classrooms.

Software Development Intern

RF-Smart | June 2020 - Present

- Works closely with QA/Automation team, updating legacy testbed to current standards.
- Built data scraping tool that reads through entire testbed and automatically produces useful metadata like tags and descriptions.

ACADEMIC BACKGROUND

FullStack Academy | Oct 2019 - May 2020

26-week Coding Bootcamp focused on preparing students for work as professional software engineers.

Florida State University | Aug 2014 - Dec 2017

Relevant courses:

- Programming I | October 2015
- Introduction to Unix | October 2015
